Teas

Fresh tea served in a pot with extra hot water

English Breakfast
A classic standard black tea from Keemun in China. A rich slightly smoky tea with a honey aroma and perfect 'on point' astringency. This tea has a high level of caffeine.

Irish Breakfast
A combination of black tea from Ceylon (Sri Lanka) and Assam (India) to get your day off to a good start. It seamlessly blends citrusy notes with a malty pungent underscore. This tea has a high level of caffeine.

Rooibos
Colloquially known as 'Red Tea', this superior grade of fruity, sweet, rounded, mild and smooth blend from South Africa has a refreshingly herbal texture. Enjoy this tea with honey or a slice of lemon. This is a decaf tea.

Jade Oolong
The Jade Oolong is a highly prized tea from Nantou country, Taiwan. Once infused the leaves gradually unfurl to release their essential oils. A fresh green floral character with a sweet clean delicate mouthfeel. This tea has a moderate caffeine level.

Masala Chai
In Indian culture, 'Masala' means 'a blend of spices', and 'chai' simply means 'tea'. So, Masala Chai is literally 'spiced tea'. This tea combines premium Ceylon black tea with warming cinnamon, cardamom and ginger. A warm and inviting fragrant, zesty flavour (without being too hot or spicy) and invigorating, aromatic finish. This tea contains a high level of caffeine

Earl Grey Moonlight
Your senses will swoon at the first sip of this Earl Grey cream blend. Vanilla and cream combine to soften the bergamot citrus notes of this traditional black tea. This tea is perfect for afternoon tea, pair this black tea with cupcakes for a delightful tea party. Or enjoy this fragrant Earl Grey everyday, as a unique twist in your usual morning cuppa. This tea has a high level of caffeine

Earl Grey Bravo
Traditional black tea with bergamot citrus and cornflowers, Earl Grey Bravo is a classic artisan blend. The perfect afternoon tea, this Earl Grey is zesty and exhilarating with a fresh citrus aroma. Earl Grey Bravo offers a well-balanced orange sweetness alongside the tang of Ceylon tea from Sri Lanka. This tea contains a high level of caffeine

Spearmint
A native of the Mediterranean, spearmint was revered by ancient Romans for its ability to 'soothe the mind.' It continues to be savoured for its refreshingly clear aroma and soothing qualities. If you find peppermint a bit too cool sometimes, spearmint is definitely for you. This herb has a rounded, slightly smother and more grounded taste than peppermint, with warming and cooling notes. Very gentle to the palate, and naturally caffeine free.

Peppermint
A native of the Mediterranean, peppermint leaves were often used to crown luminaries in ancient Greece and Rome. It continues to be revered for its cooling, crisp aroma, deeply refreshing flavour and smooth finish. If you have yet to try gourmet peppermint tea, made from just pure peppermint (no added oils or sweeteners), you'll be pleasantly surprised by its superior flavour. This tea contains no caffeine.

Fruit Medley
Fruit Medley is a jammy sweet mix of strawberry, hibiscus flowers, apples, rose hips and lemongrass. Deep, rich fruity flavor, sweet-spicy aroma, full bodied and refreshing. Gentle herb notes help lighten up the fruitiness and give the cup some bounce. Completely caffeine free with no sugar or other sweeteners.

Lemongrass and Ginger
This uplifting, aromatic, zesty lemongrass and ginger blend with soothing peppermint and licorice root gives you a therapeutic hug in a cup. Ginger helps clear your sinuses, peppermint helps to soothe your stomach, lemongrass and peppermint provide uplifting caffeine-free energy, while licorice root coats and calms your throat. This tea contains no caffeine.

We have a selection of freshly ground coffees. Simply decide which coffee you would like and then choose how you would like it served.

Ethiopian Yirgacheffe (House Coffee)
Grown in the Sidamo Province of Ethiopia, it is among the best of the washed coffees: coffees that undergo a process before roasting, whereby the cherry of the bean is removed before the bean itself is dried. Washed coffees benefit greatly from this process, as once the cherries are immersed in water, unripe ones will float and be removed from the process, while ripe ones will sink and be used. This ensures the highest quality beans in each batch. This is a smooth, mild coffee, with a distinct fruit-like acidity that adds a pungent addition to the traditional mocha flavour.

Brazil Impenema
Exclusively prepared bourbon variety cherry beans. This unique coffee is slightly citric, has noticeable acidity and evident floral overtones. Its soft mellowness and sweet taste stands alone producing distinct fragrances and aromas. The after taste is long, pleasant and almondy. Brazil Impenema is suitable for all brewing methods, but excels in espresso-based drinks in particular.

Panama La Torcaza
Grown exclusively on the Janson Brother's famous coffee estates, located in the highlands of Western Panama. The estates' rich volcanic soil, combined with ideal altitude and a relatively flat acreage, create excellent conditions for growing these fine Arabica beans, which are 'micro-processed' to ensure freshness. Panama La Torcaza is a medium strength coffee that is delightfully rich, with delicate floral notes and a sweet after taste.

Old Brown Java
Ideal for espresso, the strong Old Brown Java beans are aged as green beans for at least two years before being roasted, giving the coffee a heavier body and a powerful flavour, but very little acidity. The process of ageing beans is popular among many Javanese coffee producers and can last for as long as three years, during which green beans may be 'monsooned' by being exposed to the warm, moist air of the rainy seasons. As the green beans age they often begin to turn to a light brown colour, and the longer they are aged the more flavour they gain.

Swiss Water Decaffeinated
Decaffeinated coffee is ideal for those who want to enjoy their favourite blends at any time of day, without the effects of caffeine, however the process of removing caffeine from a bean can also remove much of the bean's flavour. That's why the Swiss Water Process is a favourite method of decaffeinating coffee: it doesn't use any chemicals. In the method, coffee beans are first soaked in hot water to remove 99.9% of the caffeine. This liquid is then processed through activated charcoal to remove the caffeine, leaving behind the flavoured, caffeine-free liquid. The beans are then soaked in this liquid to absorb the flavour, resulting in a decaffeinated coffee bean that is 100% free of chemicals, and packed full of flavour. Swiss Water coffee is a medium roast Arabica from Brazil, versatile and flavoursome enough to be enjoyed filtered or as an espresso, and it won't keep you up at night.
